

SD STEEL
CORPORATION
Every Detail Defines Us

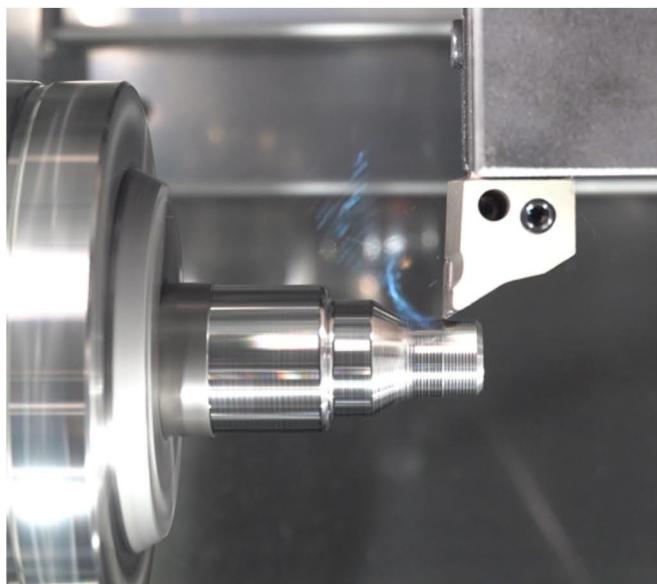

An ISO 9001 : 2015
Certified Company

**Manufacturers & Exporters of
All Type of Metal Turned & Milled Components**
MS, SS, Copper & Aluminium CNC Work

About Us

Leading Manufacturer of Metal Turned & Milled Components

SD Steel Corporation established as manufacturer of Metal Turned Components & Fittings. We are committed in our efforts to give you total satisfaction in terms of product and services. Over years we have continuously upgrade our systems and technology to provide our customers with best quality at competitive rates. We give our customer excellent technical support through out the manufacturing process to ensure very best possible products.

We're in Manufacturing business Since 1990 and we provide best quality components and services.

Quality

Our target is to provide zero defects products to client which is remarkable in industry. To meet the global demand we take care at every stage right from raw material purchase to finished goods. Our quality assurance team is trained and well experienced. To achieve the maximum standard our quality control team continuously monitors the products and user requirement right from the production stage up to the final dispatch. Every employee of the company is committed to the pursuit of excellence with continuous improvement of the Quality Management System.

Our quality assurance team is trained and well experienced. We have lab area with modern equipments. We have established separate department for final inspection. We assure that all parts supplied by us are compatible and interchangeable with the corresponding original part and all critical dimensions and tolerances are in accordance. All products made by Reena Brass Industries are tested and inspected by certified professionals. Our measuring instruments are also calibrated by accredited authorities.

Our primary goal is to provide highest quality product with good customer centric service. We will achieve this goal by continuous monitoring and improving our performance which are based on client needs and tough objectives.

Stainless Steel Components

We Manufacture Stainless Steel Turned Components, Stainless Steel Machine Components, Customized Stainless Steel Components, etc. Our products are known in the market for their superior varieties and durability. These are widely appreciated for their sustainability, reliability, and precise designs. We ensure the most reliable products which are available in the best specification at the most profitable price range. Our products use in many industries like Automotive, Material handling, Textile industry, Medical, and Engineering sectors.

Mild Steel Components

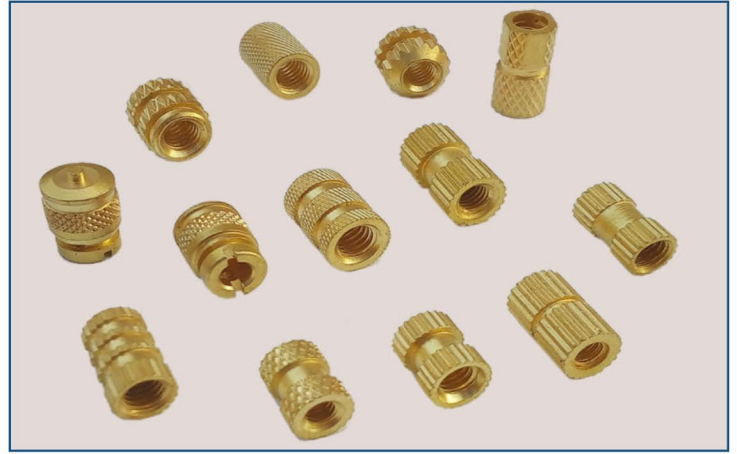

We are specialized in manufacturing of Mild Steel Turned Components in designs. We have strong command in the machining of this material as well as its variant grade like the En series. While machining we keep our specified tolerance to achieve the final size easily. We work for high precision and accuracy. We are supplying these parts to Electromechanical Industries, Fasteners, Automobile Industries, Electronic, and Electrical fittings. Any kind of Mild Steel Turned Components can be developed and supplied exactly as per customer specifications.

Brass & S.S. Fittings

We are the leading organization in the manufacturing and supplying Pneumatic & Hydraulic Fittings. Our Pneumatic and hydraulic Fitting Components are based on small external dimensions to large internal ones. Company's unique characteristics lies in providing complete range of pneumatic and hydraulic fittings in various metal material, abiding to its global quality requirements and adhering to path of engineering excellence.

Brass Inserts

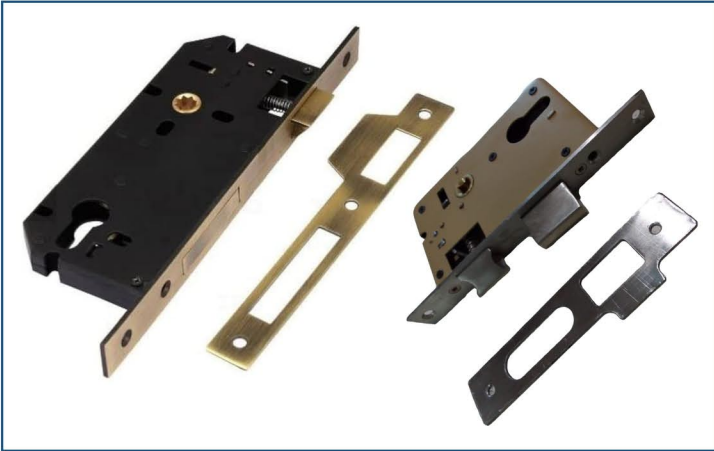

The wide range of Brass Inserts include threaded molding inserts, ultrasonic molding inserts, knurled molding inserts, molding inserts for plastic, wood molding inserts and more. The range of standard and high quality molding inserts designed to molded into the plastic, wood or any molded components. We are looked upon as one of the prominent Brass PPR, CPVC & PPRC Inserts Suppliers in India. The brass used in the manufacturing of the Brass PPR, CPVC & PPRC Inserts is of optimum quality that ensures high durability, tensile strength and resistance to corrosion. High temperature bearing capacity has also made the Brass PPR, CPVC & PPRC Inserts ideal for various industrial applications.

Brass Precision Components

We are leading manufacturer of Brass Precision Components providing customized products to achieve the desired specialization in the production of parts. These components are widely used in Engineering, Aerospace, Medical, Agricultural, and Machine Tool Industries. We are well known in the market for our various excellent products. We manufacture these components as per client's customized requirements. We manufacture these parts using high-grade raw materials like steel, stainless steel, brass, copper, aluminium and many more as per the industrial standards and customer specifications.

Brass Lock Parts

Our clients can avail from us broad assortment of Mortise Lock Parts that is available in various sizes, shapes and diverse colors. Situated in Jamnagar (Gujarat, India), we have constructed a wide and well functional infrastructural unit that plays an important role in the growth of our company. We offer these products at reasonable rates and deliver these within the promised time-frame.

Brass Fasteners

We provide High-Quality Brass Fasteners with variety of types. Generally, Fasteners are hardware components that mechanically joins two or more elements together. Brass Fasteners are easily removable without any damages the joining components. They are made from brass, mild steel, stainless steel and other material composition. Brass Fasteners are defined various types such as Screw, Washer, Anchor, Nuts, Rivets, Inserts, Bolts and many more.

Brass Automobile Parts

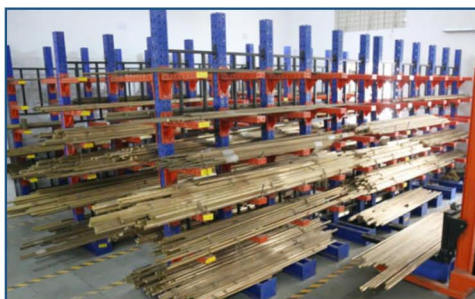

Automotive fittings leading manufacturers and suppliers of brass automotive components since decades. Our brass auto parts are widely utilized for different automobile vehicles like cars, bikes etc. They can be availed in different keying outlines and completely abrasion resistant.

We make sure that our automotive fittings are 100 percent dimensionally accurate with robust housing benefits. We offer expert solutions and brilliant range of auto components.

Automotive fittings are always available in flexible sizes, dimensions and shapes. These customized solutions make sure that our components suit perfectly to your complex project requirements. Further, they are offered at optimum prices to suit your pocket. They can be used freely for different industrial applications.

Infrastructure

Our manufacturing unit is equipped with latest machines and technology to produce zero-defect and high performance Brass Components. The sophisticated production facilities enable us to execute orders of various sizes and specifications. The infrastructural facilities are also equipped with sophisticated packaging equipment and machinery to ensure quality packaging that ensures safety of products during transit and delivery.
